# PORT OF ASTORIA

## MEETING NOTICE

TO: Those Listed

FROM: Floyd Shelton FLS

SUBJECT: Public Meeting – Skipanon River Development
Thursday, July 30, 1981, 7:30 p.m.
Port of Astoria Commission Room

The Port of Astoria Commission was presented with a petition signed by 571 citizens requesting that "the Port of Astoria and the City of Warrenton initiate immediate action to have the government, through the Corps of Engineers, perform necessary and justifiable dredging in the Skipanon River as follows:

1. Provide a channel 18 feet deep at mean lower low water and 200 feet wide from the Columbia River to just below the railroad bridge in the Skipanon River.

2. Provide a channel 6 feet deep at mean lower low water and 40 feet wide from just below the railroad bridge to the dam at 8th Street.

3. Provide a channel 6 feet deep at mean lower low water and 40 feet wide in the old bend of the river just upstream from the railroad bridge."

The Port of Astoria Commission agreed this petition expressed community concern regarding development of the Skipanon River. Therefore, the Commission will conduct a public hearing Thursday, July 30, 1981, at 7:30 p.m.

If you wish to testify, please notify Christine Rose, 325-4521.

In order to hear all testimony on July 30, speakers are requested to limit testimony to 5 minutes.

Written testimony will be accepted before or during the hearing. All testimony will be made available to the public.

Honorable Les Newton, Mayor, City of Warrenton
Warrenton City Council
Elmer Salmi, Warrenton Chamber of Commerce
Clatsop County Commission
Jack Beckly, U.S. Army Corps of Engineers, Chief, Waterways Maintenance Branch

MINUTES - PORT OF ASTORIA
PUBLIC HEARING
SKIPANON RIVER DEVELOPMENT
THURSDAY, JULY 30, 1981 TAPE:
PORT COMMISSION CONFERENCE ROOM

Those in attendance were: Charles J. Thomson, Richard Olsen, Bern Shultz, Gene Dielkes, Herb Palmberg, Elmer Salmi, Jim Bergeron, Harold Herndon, Jack Bechly, Chris Genna, Mike Delapa, S. Dix Blomberg, George Blomberg, Gilbert Gramson, Max Berryaman, John Kalander, E. R. Baldwin, A. J. Conger, Norman Kujala.

Commissioners present included: Shaylor, Niemi, Johnson, Desler, Zafiratos. Staff present included: Shelton, Notos, Shannon, Rose.

The meeting was called to order at 7:30 by Chairman Fred Shaylor. He explained that this public hearing had been called by the Port of Astoria Commission at the request of a petition signed by 571 people, which asked for the Commission's support in obtaining authorization from the Corps of Engineers for additional dredging in the Skipanon River. Chairman Shaylor introduced Mr. Jack Bechly, Chief, Waterways Maintenance Branch, U.S. Army Corps of Engineers. Mr. Bechly discussed the Lower Skipanon project which is currently authorized to 14 feet at M.L.L.W. from the Columbia River to just below the railroad bridge. He advised that this project was authorized to 30 feet, however, the Corps did not feel there was economic justification for a channel deeper than 14 feet based on the present traffic on the river. He advised the majority of boats using the river currently draw 10 to 12 feet.

Next, Chairman Shaylor called on Gil Gramsom, City of Warrenton. Mr. Gramson deferred his comments until later in the meeting. Chairman Shaylor then called on Mr. Elmer Salmi of the Warrenton Chamber of Commerce, also representing the Warrenton Boat Yard. Mr. Salmi discussed the need for dredging of the Skipanon as outlined in the petition submitted to the Commission on July 14, 1981. He reiterated the requests contained in that petition.

Chairman Shaylor then called on Mr. A. J. Conger, a local fisherman. Mr. Conger expressed his opinion that the best place for moorage in the area was at the Warrenton marina and he felt this waterway should be further developed beyond the 14 feet. Chairman Shaylor then called for additional public comment. Mr. Norman Kujala, owner of Oregon Ocean Services, 225 S. W. Galena, Warrenton, Oregon. Mr. Kujala submitted written testimony dated July 30, 1981, which is attached. Chairman Shaylor then called on Mr. Richard Olsen, a Warrenton land owner, who offered his help to remove snags and sinkers from the channel. He urged the channel be adequately dredged.

Chairman Shaylor then called on Mr. Bern Shultz. Mr. Shultz testified in support of dredging the upper Skipanon projects. He submitted testimony which is attached. Also, a copy of a Corps of Engineers record dated December 21, 1971.

Chairman Shaylor then called on Mr. Jim Bergeron, OSU Marine Extension agent. Mr. Bergeron said he represented several fishermen who were out fishing at the time of the hearing. Mr. Bergeron advised these fishermen have problems stemming from their hitting sinkers and snags in the Skipanon River. Chairman Shaylor then called on Mr. Gil Gramson, City Manager, Warrenton. Mr. Gramson then outlined the City's efforts to facilitate dredging projects on the Skipanon. He indicated the City did not object to dredging the river to 18 feet. However, he urged the 14-foot project be accomplished as soon as possible, and a separate project be undertaken to request additional dredging beyond the 14 feet.

Chairman Shaylor then introduced again Mr. Jack Bechly, Corps of Engineers. Mr. Bechly discussed the Corps' limitation and requirements for new projects. He advised there was a need for a local sponsor to formally request the project in order for the Corps to proceed with a feasibility analysis. Mr. Elmer Salmi quoted a letter dated February 14, 1980, from Mr. George Grove, former Executive Director, Port of Astoria, to Mr. Adam Heinemann, Chief-Navigation Division, U.S. Army Corps of Engineers. Mr. Grove indicated in his letter the Port of Astoria would act as the local sponsor for a dredging project above Harbor Street Bridge to Eighth Street Dam River.

Other citizens submitted written testimony. They were Charles J. Thompson; Jack R. Hams, and D. E. Palmberg, Partners, North Coast Mini Storage; David E. Palmberg, citizen, Warrenton; John T. Davis, boat owner; and John R. Kolander, West Coast Propeller Service, Warrenton, Oregon.

Mr. Elmer Salmi, Managing Operator, Warrenton Boat Yard, also submitted some written testimony as well as verbal.

There being no further comment, the meeting was adjourned.

July 30, 1981

Port Commissioners
Port of Astoria
Astoria, OR 97103

Dear Sirs:

Oregon Ocean Services is a fish-processing firm located above the two bridges in Warrenton - the new highway bridge and the Railroad bridge, on the old Skipanon River Channel.

We process bottom-fish and salmon with five to seven employees, and this is our third year of operation. We sell some fish locally, but more is sold in Portland and out of state, such as California, Texas, and Hawaii.

The shallow channel both above and below the bridge is a constant problem for us. We use a shallow draft barge, which draws only 12 inches, to move our fish from the lower river to our facilities on the upper river. On minus tides we must leave at least two hours before low water to avoid getting stuck with either the barge in the upper river or with our 50-foot dragger, Cygnet II, moored below the Railroad bridge. We can tell you where several sinker logs are that we have bumped and slid over on our way down the channel with our dragger.

Our current facilities consist of a floating fish-processing plant with an adjoining unloading dock and freight elevator. We are planning a shore-side building for 1982 which would have another cold room plus a freezer, packing room, and storage room.

Dredging the channel is of everyday importance to our operation.

Sincerely,

Norman Kujala

Port Commission
President Shalor
Port-of-Astoria
Astoria, OR. 97103

Gentlemen:

May we suggest deeper dredging than the proposed 14' to accomodate the larger boats in the area - an 18' depth would leave a margin of safety from potential drifting of sunken logs within the traffic channel.

Also dredging of the original turning basin near R. R. bridge would provide a safety margin to boats entering the shipyard, crab cannery, fish plants and moorages.

Any amount of wider dredging of this area will promote local establishments, and local area economy.

Respectfully,

Elmer Salmi

Re: Dredging Skipanon River

Gentlemen,

This letter is my testimony to a public hearing to be held in the Port Commission Meeting Room on July 30, 1981 at 7:30.

I wish to express my thoughts as an owner of 4 fishing vessels that use the Skipanon River for moorage and dry dock facilities.

Our average vessel is 68' long and has a draft of 10'6". At present we can only use the Skipanon River at 1/2 tide because of shallow water in the river and at the mouth of the river where it meets the Columbia River.

Although dredging the river to 14' will be an improvement, I feel a 18' Channel is more realistic due to the fact much larger mid-water trawlers unload their products at fish processing plants along the Skipanon River. These vessels, I would estimate, to draw 13' to 14'.

Also by only dredging to 14', I feel that in the very near future the Channel would have to be dredged again.

It is also my understanding by speaking with the City of Warrenton that as soon as the Channel is properly dredged that the plans of the City of Warrenton is to double the present mooring spaces for the larger fishing vessels.

Our organization brings to the Astoria, Warrenton Area 21 full time jobs and contributes to the area payroll of more than $400,000.

In service and supply ouraverage purchases in these communities is in excesss of $300,000.

With the above thoughts in mind, I feel that if we are to remain in the community, improvement to the Skipanon River is of high priority in the coming year.

Yours very truly,

Charles J. Thompson

re: Public Hearing concerning dredging Skipanon River above and below Highway bridge.

As a concerned business in the City of Warrenton and Clatsop County we are in favor of dredging the lower Skipanon River to 18 feet below Mean Lower Low Water. Many of our customers are fishermen or are connected with the fishing industry or recreational boating industry. To have a greater depth in the channel would benefit existing boaters and bring more and larger vessels to our area.

We are likewise in favor of dredging the Skipanon River above the bridge to the 8th street dam. This would also bring more boaters and more commercial business to our area.

The above improvements to the Skipanon waterway would definitely bring to our area more potential customers for our specific business and most obviously other businesses.

Very truly yours,

North Coast Mini Storage

Jack R. Nams, partner

D. E. Palmberg, partner

Re/ Dredging Skipanon River above and below Highway bridge.

Being a landowner on the upper Skipanon River and local business owner, I am strongly in favor of dredging the lower Skipanon River to minus 18 feet and of dredging the upper Skipanon River to project depth and length including restoring depths in the old bend of the river.

I personally have a permit application in with the Corps of Engineers for improvements in the upper Skipanon River for a 24 boat moorage and there is a permit request to the Corps for improvements to moor 2 gilnet boats. There are 2 facilities existing in the upper river (a floating fish processing plant with dock and a pipeline dredge moored). There is also a pending request for moorage of a pile driver crane barge in the upper river along with unlimited potential development.

The State and Railroad company have spent upwards of 2 million dollars in the last few years upgrading the bridges over the river to accomodate water vessel traffic. To now not to be able to utilize the river shows not only total disregard for potential and requested growth and past history but inexcusable economic waste. The bridges were reconstructed to accommodate shallower draft vessels upstream and allow more area for deeper draft vessels downstream.

Respectfully submitted,

D E Palmberg

Port Commissioners
Port of Astoria

I am a boat owner and operator, fishing out of the Skipanon River. I urge you to consider the deepest depth possible when contemplating dredging

My vessel is only 65' with a registered depth of 6.6 feet. At the present time I'm laid up waiting to get hauled out to change wheels as I hit a sinker that was laying on bottom. This happened last year also. Besides being expensive to repair we are losing fishing time. Neither time was the tide below 0.0.

I sincerely hope that you will support an 18' depth

Thank You
John T. Davis

July 29, 1981

Port Commissioners
Port of Astoria
P. O. Box 569
Astoria, Oregon 97103

Gentlemen:

Re: Skipanon River Dredging Project

Let it be known that I heartily support the dredging projects as listed in the petitions recently submitted to the Port of Astoria.

That is - Providing a channel 18 feet deep at mean lower low water and 200 feet wide from the Columbia River to just below the railroad bridge;

- Providing a channel six feet deep at mean lower low water and 40 feet wide from just below the railroad bridge to the dam at 8th Street;

- Providing a channel six feet deep at mean lower low water and 40 feet wide in the old bend of the river just upstream from the railroad bridge.

Being directly involved with the marine industry, I am aware of the needs of the boat owners. Almost every day, people come into my shop in Warrenton and ask me about boat moorage. There is a very obvious need for more space. I feel that dredging the upper Skipanon River would open up a whole new area for mooring boats. The smaller boats could be moored in the upper river, leaving the lower, deeper water for the large, commercial boats. This would be beneficial to the boaters, as well as the rest of the marine industry in this area.

Sincerely,

West Coast Propeller Service

To: Port of Astoria Commissioners

Re: Dredging.

Gentlemen;

In an attempt to justify my criticism of your inaction relative to dredging in local areas of economic concern, I submit these brief comments:

1. The undersigned and the Corps of Engineers have for some time recommended to the Port of Astoria channel-flow disposal of Port slip dredging with screening by resource agencies(see enclosure). Finally, such dredging was done, but without required screening. The result could be extremely costly to the Port in future slip dredging.

2. Conflicts of attitude within local public bodies have been delaying authorized dredging of Skipanon River even though the Corps of Engineers in 1981 has already done maintenance dredging in Rogue River, Coos River, Siuslaw River, Tillamook Bay, Quillayute River and other waterways. Effort should be made to overcome conflicts and get local dredging done.

3. Petitions signed by hundreds of commercial fishermen, local businessmen and others interested in development of Skipanon River will soon be delivered to our Congressmen requesting dredging of Skipanon River to depths below mean lower low water of 18 feet and 6 feet, respectively, downstream and upstream from the Burlington Northern Railroad span. Hopefully, local public bodies will cooperate in supporting justification for this needed dredging.

4. Inquiry reveals that neither the Port staff nor Port Commissioners are familiar with the Upper Skipanon River area. Nevertheless, the Port has agreed to be Sponsor for dredging in that area. Reluctance of Port management to ask for dredging in the upstream area and dredging to needed depth of 18 feet in lieu of 15 feet in the downstream area because of the possibility of the Port having to pay the extra cost is incomprehensible. The Corps of Engineers will evaluate economic justification of the desired dredging after which the Port is free to make its own decision relative to any contributory cost, none of which was required for the dredging referred to in Par. 2.

I strongly urge that the Port give equitable consideration to its entire area of representation to preclude an elective process which could reduce that area and create a competitive Port District.

Respectfully submitted,

H. G. Palmberg

PETITION

The undersigned petitioners request that the Port of Astoria and the City of Warrenton initiate immediate action to have the government, through the Corps of Engineers, perform necessary and justifiable dredging in the Skipanon River as follows:

1. Provide a channel 18 feet deep at mean lower low water and 200 feet wide from the Columbia River to just below the railroad bridge in the Skipanon River.

2. Provide a channel 6 feet deep at mean lower low water and 40 feet wide from just below the railroad bridge to the dam at 8th street.

3. Provide a channel 6 feet deep at mean lower low water and 40 feet wide in the old bend of the river just upstream from the railroad bridge.

# PETITION

The undersigned petitioners request that the Port of Astoria and the City of Warrenton initiate immediate action to have the government, through the Corps of Engineers, perform necessary and justifiable dredging in the Skipanon River as follows:

1. Provide a channel 18 feet deep at mean lower low water and 200 feet wide from the Columbia River to just below the railroad bridge in the Skipanon River.

2. Provide a channel 6 feet deep at mean lower low water and 40 feet wide from just below the railroad bridge to the dam at 8th street.

3. Provide a channel 6 feet deep at mean lower low water and 40 feet wide in the old bend of the river just upstream from the railroad bridge.
